FOLDED Origami

4 * A designer Jiangmei Wuhas criou uma delicada coleção de candeeiros à base de papel de algodão reciclado e equipados com lâmpadas LED. Recorrendo ao Origami, a arte japonesa de dobrar papel, Wuhas apostou no desenvolvimento de estruturas ultra-leves, fáceis de produzir e montar, atribuindo-lhes formatos geométricos distintos. Uma vez montados, os candeeiros *Folded* mantêm a forma sem ser necessário recorrer à aplicação de materiais adicionais.

Designer Jiangmei Wuhas has created a delicate collection of lamps made with recycled cotton paper and fitted with LED bulbs. Using origami, the Japanese art of paper folding, Wuhas has chosen to develop ultra-lightweight structures that are easy to produce and assemble, giving them distinct geometric shapes. Once assembled, the *Folded* lamps hold their shape without the need to apply additional materials.
